

CryptoTrace - Investigation Report: INV-001

Fraud probability: 39% | Graph hash: d8f1c8f16267df151193e17b8eae01e6
Total value: 0.001 ETH | Traceable: 0.0 ETH | Unclassified: 0.001 ETH
This report identifies the likely exchange endpoint and supporting evidence for a legal request. It does not identify a real person — that requires the exchange's own KYC process, which is outside this system's scope.

	Tx hash	Amount	Asset	Timestamp	Value at tx time (USD)	VASP	Explorer
33a4a7d9	0x80c5565917ba4152	0.0005	ETH	2026-09-01T18:50:23Z	historical price unavailable	UNKNOWN	https://

Wallet clusters

No wallet clusters were inferred from the available evidence.

Risk flags

- Direct exposure: direct_exposure (confidence: low)
- VASP linkage: vasp_linkage (confidence: low)
- Unclassified flow: unclassified_flow (confidence: medium)
- Propagation depth: propagation_depth (confidence: low)

Checksum (evidence integrity):
7e2557ab0307314ccf222e30edade48df712eaa33368bf2d305126f67d64226f
This checksum lets an investigator verify this evidence record has not been altered since it was generated.

Limitations:

This is an investigative lead based on public blockchain data. VASP matches and cluster heuristics are probabilistic and should support, not replace, legal/compliance review.
