

CryptoTrace - Investigation Report: INV-002

Fraud probability: 56% | Graph hash: d02c7069e1fbd1299a0bd7754222ccde
Total value: 35.0 ETH | Traceable: 0.0 ETH | Unclassified: 35.0 ETH
This report identifies the likely exchange endpoint and supporting evidence for a legal request. It does not identify a real person — that requires the exchange's own KYC process, which is outside this system's scope.

Wallet clusters

No wallet clusters were inferred from the available evidence.

Risk flags

No risk flags fired for this case.

Checksum (evidence integrity):
598483e441963b9522d7ea8a534b60b964be248bc01132ca24dc05bb8c539197
This checksum lets an investigator verify this evidence record has not been altered since it was generated.

Limitations:

This is an investigative lead based on public blockchain data. VASP matches and cluster heuristics are probabilistic and should support, not replace, legal/compliance review.
